

RAWLS SPRINGS UTILITY
39 ARCHIE SMITH RD
HATTIESBURG MS 39401

4/02/2019

Dear Customer,

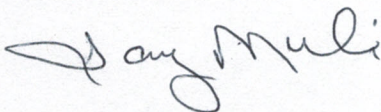

The everyday cost of providing quality water and meeting State and Federal guidelines has steadily increased over the past few years. In addition, the cost of materials and services necessary for day-to-day operations has continued to go up. Due to these increasing expenses, it is necessary that the Board implement a new rate schedule. This new rate will become effective in May and be reflected on your June bill.

After a detailed study and much discussion the new water rates will be follows:
Residential: \$12.00 for the first 2000 gallons and \$2.75 per 1000 gallons thereafter
Commercial: \$22.00 for the first 2000 gallons and \$2.75 per 1000 gallons thereafter
Sewer Rates: \$17.00 for the first 2000 gallons and \$0.50 per 1000 gallons thereafter

It has always been and will continue to be our goal to provide quality and services at the most affordable rate.

If you have any questions, please call our office at 601-268-2248

Sincerely,

Rawls Springs Utility District
Board of Directors

P.S. Just a reminder to check leaking faucets, hoses, and toilets. Any leak increases your water bill.
